

Technique makes all the difference. (Consider the at-home version of your hair stylist's perfect blow-out.) Same goes for lip augmentations. While all practitioners have access to the same injectable filler products, their results can vary widely depending on their level of training, amount of experience, individual philosophy and injection technique. Dr. Manraj (Raj) Bath of Bella Cosmedica custom aesthetics is emerging as the local go-to guy for lovely, natural-looking lip augmentations. In addition to lecturing nationally to cosmetic practitioners regarding his "Lip 6" technique, Bath has been published in *The American Journal of Cosmetic Surgery*. He

even has a patent pending for his novel approach to lip augmentations. As a result, word of his work is spreading in local and national circles with lip plumping becoming one of Bella Cosmedica's most frequently requested procedures. "Any practitioner can use filler to make a patient's lips larger, but that's not necessarily what makes lips or the patient more attractive," explains Bath. His patients appreciate the extra time he spends in careful evaluation of their lips and surrounding anatomy. "We seek to enhance a patient's own anatomy and give them a very natural appearance while educating them about what makes for an attractive set of lips."

Dr. M. Bath of Bella Cosmedica

doctor's guide to natural looking lip enhancement

4 tips for lovely lips.

- 1.) Find out what product your doctor recommends. Some fillers are better suited than others for lip augmentations.
- 2.) Celebrity-style lips do not look good on everyone. Seek to enhance your God-given anatomy for the most natural looking result.
- 3.) Ask about anesthetic options. Many fillers contain a numbing agent, but that may not be enough to maximize comfort during treatment.
- 4.) Request photos of your doctor's lip augmentation patients. Are the results attractive or overdone? What looks good in L.A. may look odd and out of place in central Ohio.
